Decorate a back yard with this heavy antique birdbath. Crafted in France circa 1950, the dish built of iron, stands on a robust circular pedestal base providing stability. It features a scalloped, shell-like basin with intricate ripples that add texture and elegance. Two bird figurines sit perched at the edge of the dish, facing inward, with finely detailed features, including wings and tails, which enhance the artistic appeal. The centerpiece is in excellent condition and adorns a rich black and silver polished steel finish. Versatile, the piece could also be used as a jardiniere, a large vide-poche, or a centerpiece filled with flowers on a buffet or table. 19"W x 15.5"D x 10"H
