Decorate a console or a mantel with this elegant pair of antique candlesticks. Crafted in France circa 1870, each candelabra stands on scrolled feet over an integral square base with an elegant, classical design. Each candlestick features a conical body made of light-colored marble, with decorative brass or gilt metal accents. The square base is elaborately adorned with ornamental details, including scrolling foliage motifs and ornate trim. The top portion where the candle is held has a floral, open-petal design, enhancing the antique aesthetic. These pieces are likely intended for decorative or functional use in an elegant interior setting. The Napoleon III candle holders are in excellent condition and adorn a two-tone patinated and gilt bronze finish. Candle not included. 4.25"W x 4.25"D x 7.75"H
