Decorate a patio with this elegant pair of antique outdoor planters filled with fruits and flowers. Carved in France, circa 2010, and built of concrete, each stone jardinière stands on a round base over a short pedestal with a gadrooned shaped basin; the neoclassical urn has a wide ribbed body with flared rim and decorated with an array of fruit and floral motifs in high relief on top. Included in the bouquet assortment are plums, grapes, apples, pears, citrus, and bananas. The "trompe l'oeil" garden ornaments are in excellent condition and adorn a beautiful patinated weathered finish and evidence of outdoor use. A wonderful addition for an outside garden. They are heavy and very durable - each one weighs over 80 pounds! Measures: 14 Diameter x 23"H.
